Profile

Motivated Full Stack Developer with strong focus on Backend Development using ASP.NET Core, C#, REST APIs, JWT Authentication, Entity Framework Core, and SQL Server. Experienced in building scalable web applications with React.js frontend integration. Skilled in API development, authentication, database design, clean architecture, and responsive UI development. Passionate about building secure, high-performance real-world applications.

Professional Experience

.NET Full Stack Developer, Bridgeon Solutions

08/2025 – Present

- Developed full-stack web applications using ASP.NET Core Web API, C#, React.js, and SQL Server
- Built secure RESTful APIs for authentication, product management, cart, and order processing
- Implemented JWT Authentication and role-based authorization for secure user access
- Designed and managed SQL Server databases using Entity Framework Core and LINQ
- Integrated frontend applications with backend APIs for real-time data operations
- Developed responsive and reusable UI components using React.js, Tailwind CSS, and Redux Toolkit
- Implemented CRUD operations, form validation, exception handling, and API response optimization
- Worked with clean architecture principles and maintainable coding practices
- Performed API testing and debugging using Postman and Chrome DevTools
- Collaborated with developers and designers to deliver scalable and user-friendly applications
- Used Git and GitHub for version control and project collaboration
- Participated in debugging, testing, performance optimization, and feature enhancement activities

Skills

Languages & Technologies

- Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, Redux Toolkit
React Router
- Backend: C#, ASP.NET  Core Web API, Entity Framework Core, LINQ, REST APIs, JWT Authentication, API Integration
- Database: SQL Server, Database Design, CRUD Operations

Tools & Frameworks

- React.js (Vite)
- Tailwind CSS, Bootstrap, Framer Motion, Postman, Swagger, Git, GitHub, Visual Studio, VS Code
- SQL Server Management Studio (SSMS), NPM, NuGet, Figma, ESLint, Prettier

Engineering Practices

- Clean Architecture & SOLID Principles
- RESTful API Development
- Secure Authentication & Authorization (JWT)
- Responsive Web Design & UI/UX Integration
- State Management & Client-Side Routing
- Performance Optimization & Debugging
- Version Control & Collaborative Development
- Scalable Application Development
- Code Quality & Maintainability Best Practices

Cloud & Development Utilities

- Render, Vercel, Netlify• Azure (Basics), AWS (Basics)• Chrome DevTools• Lighthouse• LeetCode (Problem Solving)• Agile Development Workflow• Web Application Deployment & Hosting

Projects

GuideYu, AI-Powered Skill Training & Career Guidance Platform

04/2026 – 05/2026

- GuideYU is a full-stack career guidance and learning management platform developed using ASP.NET  Core Web API, React.js, and SQL Server. The application enables users to explore career paths, access learning resources, track progress, and receive AI-powered guidance through a responsive and user-friendly interface.
- Developed a full-stack web application using ASP.NET  Core Web API, React.js, and SQL Server.
 - Built RESTful APIs for user management, learning modules, progress tracking, and dashboard functionalities.
 - Implemented JWT Authentication and integrated AI-powered features for personalized learning and career guidance.
 - Designed responsive user interfaces using React.js, Tailwind CSS, Redux Toolkit, and React Router.
 - Managed database operations using Entity Framework Core and SQL Server while applying Clean Architecture principles.
 - Performed API testing, debugging, and version control using Postman, Git, GitHub, and Chrome DevTools.

CozyCrave, e-commerce platform

11/2025 – 03/2026

- Developed a full-stack e-commerce application using React, ASP.NET  Core, and SQL Server. The platform enables product browsing, cart management, order placement, and secure data handling through RESTful APIs. Built and integrated APIs for products, users, and orders, while using Entity Framework Core for database operations. Developed an admin panel for product management, user administration, and order tracking. Designed responsive user interfaces, managed application state with Redux Toolkit, and implemented validation, error handling, testing, and debugging. Utilized Git and GitHub for version control and collaborative development.
